3. [Create your digital menu](#)
 - [Set categories](#)
 - [Add menu items](#)
 - [Add extras with modifiers](#)
4. [Manage orders](#)
 - [Open or close different ordering channels](#)
 - [Manage orders in progress](#)
 - [Mark orders as complete](#)

How to log in.

Use your Dojo account login details to access OrderIt. If you can't remember your password or haven't set one yet, please [click here](#) and select 'Forgot password.'

To log into OrderIt, go to account.order-it.com

Set up your business location.

If you have more than one location, you'll need to set up OrderIt for each one with custom URLs, menus, and settings. It's quick and easy to do. Just follow the steps below.

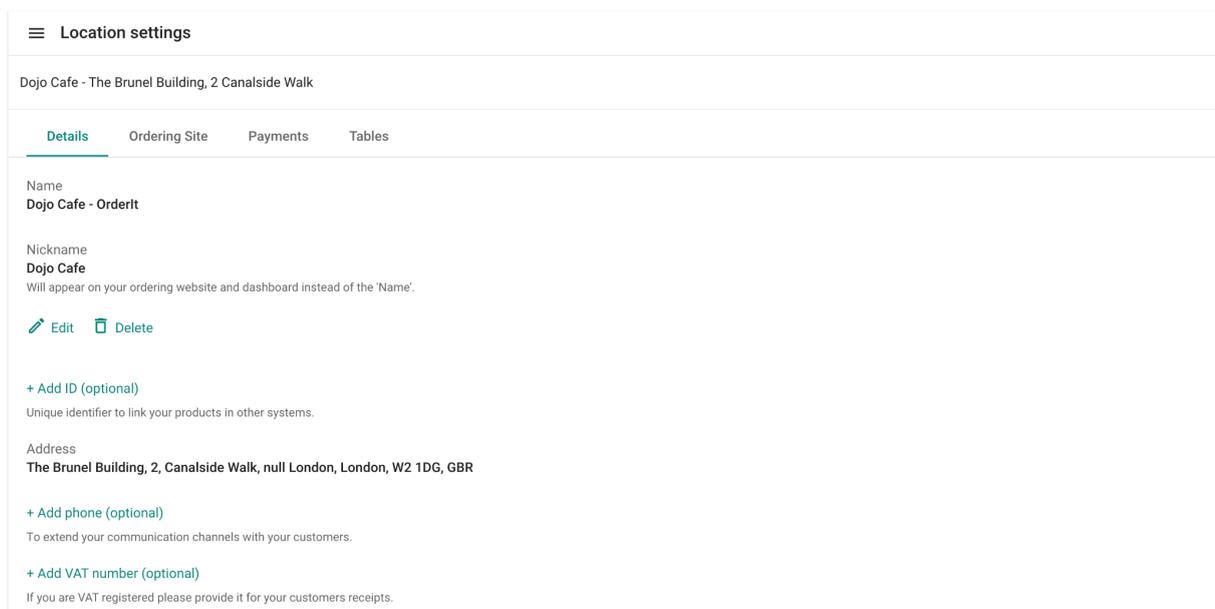

Set location details

First, click the menu button at the very top left of the screen (the icon with three lines). Go to Location settings > Details

Location address – This is the address we hold for your business. If it's not correct, you'll need to contact us at support@dojo.tech or 0800 044 3550 to change it.

Location nickname – You'll probably want to use the name of your restaurant. This will appear on your ordering website. If you don't add one, we'll use your trading name.

VAT number – If you're VAT registered, you can add your VAT number here which will show on receipts.

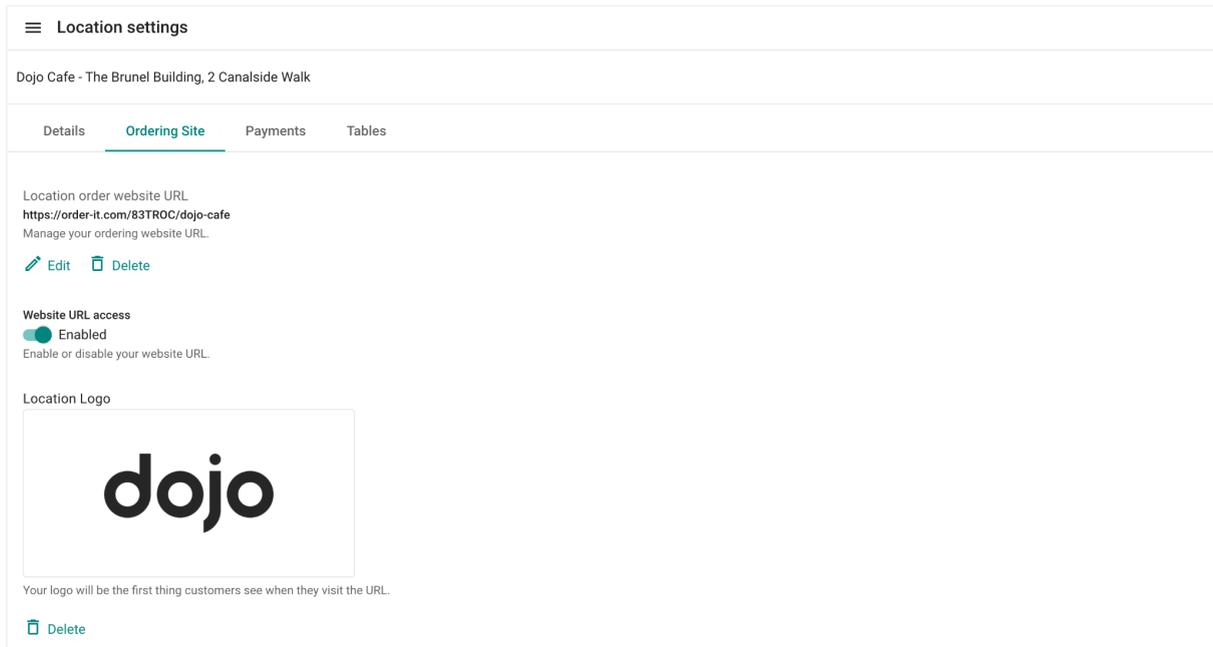

The screenshot shows the 'Location settings' interface for a business named 'Dojo Cafe'. At the top, there is a menu icon and the text 'Location settings'. Below this, the business name 'Dojo Cafe - The Brunel Building, 2 Canalside Walk' is displayed. A navigation bar contains four tabs: 'Details' (which is active and underlined), 'Ordering Site', 'Payments', and 'Tables'. The main content area is divided into several sections: 'Name' with the value 'Dojo Cafe - OrderIt'; 'Nickname' with the value 'Dojo Cafe' and a note that it will appear on the ordering website instead of the 'Name'; 'Address' with the value 'The Brunel Building, 2, Canalside Walk, null London, London, W2 1DG, GBR'; and three optional fields: '+ Add ID (optional)', '+ Add phone (optional)', and '+ Add VAT number (optional)', each with a brief description of their purpose. At the bottom of the 'Nickname' section, there are 'Edit' and 'Delete' icons.

Customise your ordering site

Go to Location settings > Ordering site > Location order website URL

The base of the website will always be order-it.com, but you can add a personalised name at the end of the URL. This needs to be unique to your business.

You should also add a logo. This will be the first thing your customers will see when they visit the URL. Allowed file formats are JPEG and PNG and the recommended size is 658px x 658px.

☰ Location settings

Website URL access
 Enabled
Enable or disable your website URL.

Location Logo

Your logo will be the first thing customers see when they visit the URL.
[Delete](#)

Tip: When adding your logo, open up your ordering website (ideally on your mobile). When you save changes you can refresh the page to see how it appears for your customers and make any further adjustments

Enable / disable your ordering site

Go to Location settings > Ordering site > Website URL access

Here, you can quickly enable or disable your ordering site. By enabling the website URL, customers will be able to access the URL and submit orders. By disabling the website URL, customers will see a 'site unavailable' notice and will no longer be able to submit orders.

You can enable your site once you've created your menu. We'll remind you again later on in this guide.

Use your QR code

Go to Location setting > Ordering site > Location QR code

Make finding your ordering website simple by adding a QR code anywhere customers queue or sit so that they can order while they wait or click & collect. Your customers will be able to scan this QR code and click the link to go directly to your site.

Need help getting materials for your QR code designed and printed? Get in touch at support@dojo.tech or call us on 0800 044 3550.

Location QR code

This QR code is unique for each location. Display it to link directly to your ordering site.

[Download](#)

Use your website URL

As well as providing a QR code for customers to access your site, you can also include the URL to link from your website or Google listing. This will be especially useful if you are enabling click & collect.

Set up your payments and service charge

Go to Location settings > Payments

Here you can edit payment settings such as currency or service charge. If you set a service charge, it will be applied to every order automatically.

☰ Location settings

Dojo Cafe - The Brunel Building, 2 Canalside Walk

Details Ordering Site **Payments** Tables

Service charge
10.00%
This will be applied automatically to each basket total.

Set up click & collect

Go to Location settings > Collection times

Once you've set your collection times, OrderIt will make collection time slots available to your customers to pick from when they want to order for collection.

Edit collection time

You need to set the estimated preparation time for collection orders. Click the order time icons at the top right of the screen on the OrderIt dashboard.

From here, you can also quickly open and close the dine-in or collection channel.

Create your digital menu.

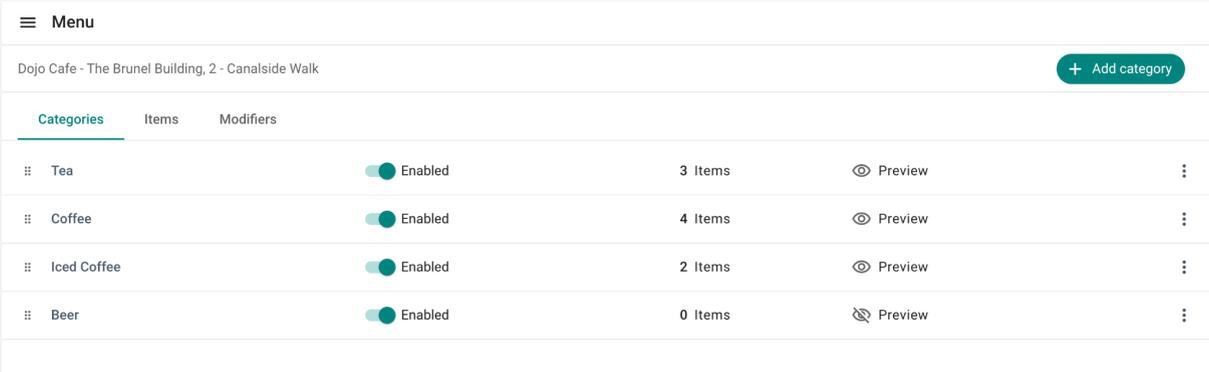

Follow these simple steps to make sure your digital menu is set up for success on both desktop and mobile.

Set categories

Go to Menu > Categories

Splitting your menu items into categories will help you group them and make it easier for your customers to scan. For example, you can group them into **Starters**, **Mains**, **Desserts**.

You can enable or disable categories based on what you want to be available at any moment in time. When your customers view the ordering site, they'll see the menu items grouped in the enabled categories.

The screenshot shows a web interface for managing a menu. At the top, there is a header with a hamburger menu icon and the text 'Menu'. Below this, the location 'Dojo Cafe - The Brunel Building, 2 - Canalside Walk' is displayed, along with a '+ Add category' button. The main content area is a table with three columns: 'Categories', 'Items', and 'Modifiers'. The table lists four categories: Tea, Coffee, Iced Coffee, and Beer. Each row includes a toggle switch set to 'Enabled', the number of items in the category, and a 'Preview' button with an eye icon. A vertical ellipsis menu icon is visible at the end of each row.

Categories	Items	Modifiers
Tea	3 Items	Enabled Preview
Coffee	4 Items	Enabled Preview
Iced Coffee	2 Items	Enabled Preview
Beer	0 Items	Enabled Preview

Add menu items.

Go to Menu > Items

To add items to your menu, hit 'Add item'. You can give each item a description, a price, and enable as many modifier sets as you like.

Then make sure you assign the item to the relevant category and tag items to show which allergens they contain.

You can also set items available for dine-in, collection or both, setting different prices to reflect the different VAT rates. You'll need to select the VAT percentage for each item based on the applicable rate. More information on VAT rates is available [here](#).

 Food Drink Other

Dine-in is set by default for each item (although it can be disabled). If you want to offer the item for collection and dine-in, you can enable it in the edit item menu and also set a different price or VAT rate.

Add extras with modifiers.

Go to Menu > Modifiers

Modifiers are used to customise items when ordering. For example, sauces, sides, or add-ons. You can set a maximum number of modifiers that a customer can select as well as allow them to select multiple, or restrict to one modifier per item. You can make modifiers free or charge for them.

Some example uses of modifiers:

Food

Let your customers select pizza toppings – they can choose none or as many as they like for an additional charge per item. Or specify which type of bun they want with a burger – where at least one must be selected, and there's no extra cost.

Drink

Let your customers select which mixer they want with a spirit, how many glasses they need with a bottle of wine or whether they want a pint or half-pint of beer.

Top tips for creating a great digital menu:

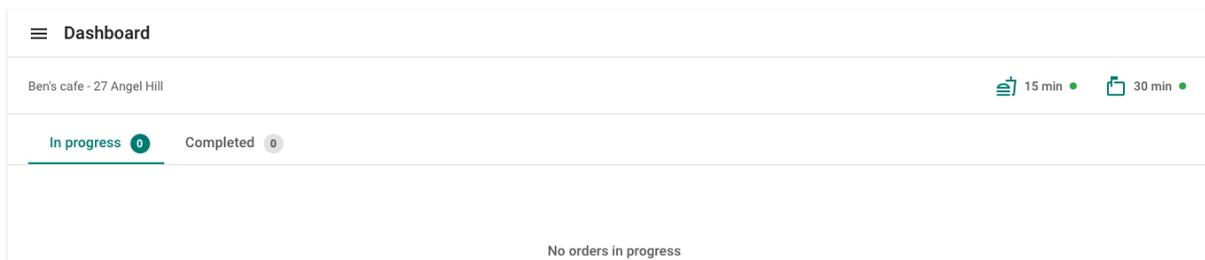

- Limit the number of available modifiers to 5 or 6 so that customers aren't overwhelmed with too much choice.
- Ensure item names are concise, clear & easy to understand
- When creating your menu, be sure to have your ordering side open on your mobile. When you save changes you can refresh the page to see how it appears for your customers.

Now that you've created your menu, it's time to switch on your ordering site.

Go to Location settings > Ordering site > Website URL access

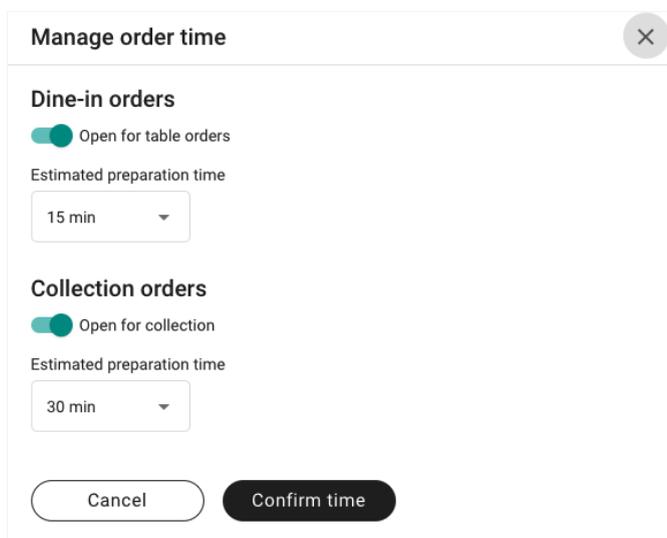

Manage orders.

To view and manage your orders, go to your OrderIt dashboard. Follow the steps below, and you'll be managing orders like a pro in no time.

Open or close different ordering channels

You can open and close different ordering channels for your location on your OrderIt dashboard. There are two channels you can use, dine-in or collection. Use the icons at the top right to open and close the channels, and set the minimum preparation time.

Depending on the channels you have open, your customers will see these options when they land on your ordering site. The minimum preparation time will determine what collection time slots are available.

Manage orders in progress

Here you'll see orders which have been submitted by your customers or accepted by you. You can view the details of each order and change the status from submitted to accepted.

Order details ×

Order #	Time	Table	Status
160621-2	13:58	Pickup on Level 9	Submitted

1x Green tea	£ 0.05
Subtotal	£ 0.05
Service Charge (10.00 %)	£ 0.01
Total	£ 0.06

Submitted means an order has been received from a customer but not yet accepted. You can mark an order as **accepted** once you are ready to prepare it.

Mark orders as complete

Once an order has been prepared and served, you can mark it as **completed**. In the completed section of the dashboard, you'll see all past completed orders.

Great news! You're all set to accept digital orders and payments with OrderIt. Now you're good to go, managing even the busiest periods will be a breeze.

Got any feedback or questions? Don't hesitate to email us at support@dojo.tech or call us on 0800 044 3550. We're always happy to help.
